Planned time frame of the project/ of using data	
From (day, month, year)	
To (day, month, year)	
Scientfc background/ primary and secondary objectves/ aims of the study (max. 300 words):	
Hypothesis, expressed quanttatvely if possible	

Feasibility**Study design and methods****Potential conclusions / relevance of results for EUthyroid2**

DATA SPECIFICATION			
Statistical resources for data analysis (human resources, know-how, software, equipment)			
Requested Data Set Ambulatory Care Setting (please select)			
Data generated in study region Norway including analysed data of urine samples	<input type="checkbox"/>		
Data generated in study region Poland including analysed data of urine samples	<input type="checkbox"/>		
Data generated in study region Bangladesh including analysed data of urine samples	<input type="checkbox"/>		
Data generated in study region Pakistan including analysed data of urine samples	<input type="checkbox"/>		
Data generated in study region UK including analysed data of urine samples	<input type="checkbox"/>		
Requested Data Set Educational Setting (please select)			
Data generated in study region Cyprus	<input type="checkbox"/>		
Data generated in study region Slovenia	<input type="checkbox"/>		
Data generated in study region Bangladesh	<input type="checkbox"/>		
Data generated in study region Pakistan	<input type="checkbox"/>		
Data generated in study region UK	<input type="checkbox"/>		
Data generated in study region Germany	<input type="checkbox"/>		
Preferred format of data (please select)			
SAS	<input type="checkbox"/>	SPSS	<input type="checkbox"/>
CSV	<input type="checkbox"/>	STATA	<input type="checkbox"/>
Additional Information			
Eligible publications:			
1.			
2.			
3.			
4.			
5.
